August 21, 2025 – Join us for G2G’s Monthly [Non-Dilutive Funding: GBG Reporting Service Webinar](#) at 12-12:30pm EST (FREE to all) and 12:30-1:00pm (premium service private consultation for G2G and GBG clients). If you’re an affiliate of BioUtah, Bio Nebraska, Focused Ultrasound Foundation, iBIO, Indiana Life Sciences Association, Georgia Life Sciences, IowaBio, MichBio, NCBiotech, NMBio, Ohio Life Sciences, South Dakota Biotech, VaBio, or WVBio – your membership gets you access to the [private consultation meeting](#).

Women’s Health – G2G’s Liz Powell leads the [Women’s Health Advocates](#), and will be speaking all over the country in September and October. [Join the community](#) if you’d like to keep up with her schedule.

	Title (Agency) and Opportunity #	Description and Link	Funding Level	Deadline
AGRICULTURE (1)				
1.	Agriculture and Food Research Initiative Competitive Grants Program Foundational and Applied Science Program (USDA/NIFA) USDA-NIFA-AFRI-011134	The AFRI Foundational and Applied Science Program supports grants in six AFRI priority areas to advance knowledge in both fundamental and applied sciences important to agriculture. The six priority areas are: Plant Health and Production and Plant Products; Animal Health and Production and Animal Products; Food Safety, Nutrition, and Health; Bioenergy, Natural Resources, and Environment; Agriculture Systems and Technology; and Agriculture Economics and Rural Communities. https://www.nifa.usda.gov/grants/funding-opportunities/agriculture-food-research-initiative-foundational-applied-science	Up to \$10 million	Varies by program area
AMYOTROPHIC LATERAL SCLEROSIS (1)				
2.	Forecast: Identify and Evaluate Potential Risk Factors for Amyotrophic Lateral Sclerosis (ALS) (CDC/ERA) RFA-TS-26-165	CDC/ATSDR is inviting research proposals to study risk factors for Amyotrophic Lateral Sclerosis (ALS). Studies on military service, contact sports, traumatic brain injury, neuroinflammation, and infections agents and exposures are encouraged. https://www.grants.gov/search-results-detail/360195	Up to \$500,000	Estimated post date: 9/29/25 Estimated proposal date: 12/1/25

	Title (Agency) and Opportunity #	Description and Link	Funding Level	Deadline
		ANTIBIOTIC RESISTANCE (1)		
3.	NARMS Cooperative Agreement Program to Strengthen Antibiotic Resistance Surveillance in Retail Food Specimens (FDA/CVM) PAR-25-014	Data from investigations conducted by applicants will assist in developing pre-approval safety evaluation of new animal antibiotics, determining parameters for the antimicrobial use in veterinary medicine, and the ability of public health actors to provide information to promote interventions to reduce resistance among foodborne bacteria. The chief goal of the NARMS food surveillance program is to monitor for antimicrobial resistance among enteric bacteria in raw retail meat commodities. https://grants.nih.gov/grants/guide/pa-files/PAR-25-014.html	Up to \$200,000 per year, for up to 5 years	Multiple deadlines; NOFO open through 4/1/27
		ARTIFICIAL INTELLIGENCE & MACHINE LEARNING (2)		
4.	Forecast: Novel Experiential Technologies Assisting Individual Learning (NExT AI) Hubs (NIH/NICHHD) FOR-HD-25-020	The new Centers will carry out research on understudied, highly innovative, and high-risk research topics related to the impact of Artificial Intelligence (AI) technologies on developmental outcomes in children at risk for developing, or who have been diagnosed with, a specific learning disability (SLD) impacting reading, writing, and mathematics. https://www.grants.gov/search-results-detail/359949	TBD	Estimated post date: 3/6/26 Estimated proposal date: 6/4/26
5.	Test Bed: Toward a Network of Programmable Cloud Laboratories (PCL Test Bed) (NSF) NSF 25-541	This program seeks to establish and facilitate the operation of distributed autonomous laboratory facilities. These laboratories will combine technological and human capacity to enable integration, testing, evaluation, validation, and translation of cutting-edge technology solutions in automated science and engineering. Science drivers include: Biotechnology experiments in scalable, high-throughput engineering and characterization services for proteins or microbes with novel applications in the U.S. bioeconomy. https://www.nsf.gov/funding/opportunities/pcl-test-bed-test-bed-toward-network-programmable-cloud-laboratories/nsf25-541/solicitation	Up to \$5 million per year, for up to 4 years	Proposal: 11/20/25
		BIOMEDICAL RESEARCH (3)		
6.	Project Call 9.1T (NIIMBL) 9.1T	Topic areas are: Real-Time Monitoring and Advanced Process Analytics for In-process Control; Integrated Modeling and Control Strategies Linking Upstream, Downstream, and Cell Line Development; Novel Protein Expression Platforms for Complex and Next-Generation Biotherapeutics; Digital and Automation Platforms to Enhance Downstream Development and Filtration Scalability; and Advanced AI/ML-driven Strategies for Biopharmaceutical Process Modeling and Optimization. https://www.niimbl.org/projects-programs/project-call-9-1/?mc_cid=d156b342c9&mc_eid=8baaf2afac	Up to \$500,000, for up to 18 months Submitters must be NIIMBL members	Concept paper: 9/16/25 Invited proposal: 1/29/26

	Title (Agency) and Opportunity #	Description and Link	Funding Level	Deadline
		BIOMEDICAL RESEARCH		
7.	Protein Sequencing (PROSE) (DoD/DARPA) DARPA-PA-25-06	The objective of the PROSE program is to demonstrate molecular readers that can accurately read a broad range of amino acids and post translational modifications in sequence for unknown protein samples. The program will seek hardware demonstrations of novel read element designs integrated with microsystem architectures. The program is open to a wide range of translocation and measurement approaches as well as microsystem designs. https://sam.gov/workspace/contract/opp/a3c2f023496548a8bea248b61922c985/view	Dependent upon proposal and available funds, for up to 3 years	Letter of intent: 8/14/25 Proposal: 8/28/25
8.	Network of Optimal Dynamic Energy Signatures (NODES) (DoD/DARPA) DARPA-PS-25-30	DARPA is soliciting proposals to develop computational models that will input protein sequences and predict their associated functions based on protein movements (dynamics) observed during folding, protein binding, and/or allosteric interactions. This program will support biomedical research by providing expedited ways to understand infectious, protect crops, develop new pharmaceuticals, and elucidate mechanism of disease. https://sam.gov/workspace/contract/opp/303f7a218cb44e6193d573ae9a2d83bd/view	Up to \$1.7 million for 1 year	Abstract: 8/29/25 Proposal: 10/7/25
		CANCER (1)		
9.	Forecast: Novel approaches to support therapeutic development in ultra-rare cancers (FDA) FOR-FD-26-004	This funding opportunity aims to explore the use of novel approaches to facilitate therapeutic development in ultra-rare cancers. https://www.grants.gov/search-results-detail/360223	TBD	TBD
		CARDIOVASCULAR AND PULMONARY HEALTH (3)		
10.	Forecast: NHLBI TOPMed: Omics Phenotypes of Heart, Lung, and Blood Disorders (X01 - Clinical Trial Not Allowed) (NIH/NHLBI) FOR-HL-25-013	This NOFO will solicit applications to use NHLBI-funded TransOmics for Precision Medicine (TOPMed) program to generate a large volume of integrated genetic and multi-omics data to facilitate discovery of the molecular mechanisms of Heart, Lung, Blood, and Sleep (HLBS) disorders. The overall goal is to move from simply cataloging genetic associations to understanding how genetic factors contribute to HLBS diseases at the molecular and cellular levels. https://www.grants.gov/search-results-detail/359942	Resource support only (X01)	Estimated post date: 8/7/25 Estimated proposal date: 10/7/25

	Title (Agency) and Opportunity #	Description and Link	Funding Level	Deadline
		CARDIOVASCULAR AND PULMONARY HEALTH		
11.	Forecast: Viral Infections in the Young Lung- The VINYL Clinical Consortium- Data Analytics and Coordinating Center (DACC) (UG3/UH3/U24 Clinical Trial Optional) (NIH/NHLBI) FOR-HL-25-032 (UG3/UH3) FOR-HL-25-033 (U24)	NHLBI seeks to advance its mission by supporting a consortium to phenotype 0-2 year old children with severe viral lower respiratory tract infections (LRTI) with follow up until pre-school age for pulmonary sequelae. https://www.grants.gov/search-results-detail/359951 (UG3/UH3) https://www.grants.gov/search-results-detail/359952 (U24)	TBD	Estimated post date: 8/22/25 Estimated proposal date: 10/22/25
		CHRONIC DISEASE (1)		
12.	Forecast: Causal Hypotheses on the Oral-Systemic Health Impacts of Human Behaviors among People with Chronic Conditions (NIH/NIDCR) FOR-DE-26-004	This NOFO will solicit applications for innovative research on the factors that cause human behaviors and the oral-systemic health impacts of those behaviors to enhance health, lengthen life, and reduce illness and disability among people with chronic conditions. https://www.grants.gov/search-results-detail/360160	TBD	Estimated post date: 3/2/26 Estimated proposal date: 6/5/26
		CHRONIC PAIN & PAIN MANAGEMENT (1)		
13.	Forecast: HEAL Initiative: Integrative Management of Chronic Pain and Opioid Use Disorder (OUD) for Whole Recovery: Health Systems (NIH) FOR-DA-27-001	The current NOFO will address how health systems could be improved to facilitate the use of effective integrative interventions, including the involvement and roles of peer specialists, clinicians, health system leaders and other key decision makers. Also, this NOFO will characterize where such care can be optimally and efficiently delivered. https://www.grants.gov/search-results-detail/360048	TBD	Estimated post date: 1/12/26 Estimated proposal date: 11/2/26
		COGNITIVE AND BRAIN HEALTH (1)		
14.	Functional Repair of Neocortical Tissue (FRONT) (ARPA-H) ARPA-H-SOL-25-120	The FRONT program aims to restore brain tissue, enabling individuals with brain damage to recover cognitive functions. The program seeks to develop methods to make non-specialized cells form into normal tissue. After these cells are grafted, FRONT will measure how well they integrate with the surrounding healthy neocortex tissue, proper layered structure of normal cortical tissue, and functional recovery. https://sam.gov/workspace/contract/opp/bc5d310af0634a3d931543150b96dfd6/vi ew	Dependent upon proposal and award mechanism	Solution Summary: 8/18/25 Proposal: 9/25/25

	Title (Agency) and Opportunity #	Description and Link	Funding Level	Deadline
		COMBAT CASUALTY CARE (1)		
15.	Future Program: Medics Autonomously Stopping Hemorrhage (MASH) (DoD/DARPA) DARPA-SN-25-100	The MASH Program aims to develop capabilities which do not require a surgeon and can occur in forward medical facilities to stabilize NCTH. MASH will focus on the key problem: finding and stabilizing the bleed inside the human torso via external, laparoscopic, endovascular or hybrid approaches utilizing novel autonomy and signal processing and existing sensor suites, surgical or endovascular maneuvers, and robotic platforms. https://sam.gov/workspace/contract/opp/7b87175548d34dedaaaaae4c07d253be/view	TBD, for up to 3 years	TBD
		COMMUNICATION DISORDERS (1)		
16.	Forecast: Transformative Non-Invasive/Minimally Invasive Technologies for Imaging the Olfactory System Across Scales (R01 Clinical Trial Optional) (NIH/NIDCD/NIBIB) NOT-DC-25-035	This NOFO will solicit applications for research on in vivo high-resolution imaging of the human olfactory system. Currently, there are limited non-invasive technologies available for imaging the living human peripheral and central olfactory system with high spatial and temporal resolution. Imaging the olfactory system in the laboratory and in the clinic is essential to understanding underlying biological mechanisms as well as the etiology of an olfactory disorder. https://www.grants.gov/search-results-detail/359696	TBD	Estimated post date: 10/27/25 Estimated proposal date: 11/27/25
		COMPLEMENTARY AND INTEGRATIVE HEALTH (1)		
17.	Forecast: Assessing the Feasibility of Incorporating Mechanisms in Multisite Clinical Trials of Mind and Body Interventions on Whole Person Health Restoration (R01 Clinical Trial Required) (NIH/NCCIH) FOR-AT-25-007	The goal of this NOFO is to establish foundational work necessary to inform and enable future large-scale clinical efficacy and effectiveness trials of mind and body interventions on whole person health restoration, as well as investigation of the potential mediating effects of mind and body interventions on whole person health restoration by established or well-studied mechanisms underlying emotional well-being (EWB). https://www.grants.gov/search-results-detail/359941	TBD	Estimated post date: 12/5/25 Estimated proposal date: 2/5/26
		DENTAL AND CRANIOFACIAL RESEARCH (1)		
18.	Forecast: NIDCR Prospective Observational or Biomarker Validation Study Cooperative Agreement (NIH/NIDCR) FOR-DE-26-011	This NOFO will solicit applications for observational or biomarker validation studies that require prospective collection or continued analysis of data/biospecimens. Well-designed, adequately powered, and well-executed clinical studies that prospectively collect data and/or biospecimens have the potential to generate robust results and advance the knowledge base to improve dental, oral and craniofacial health. https://www.grants.gov/search-results-detail/359946	TBD	Estimated post date: 11/3/25 Estimated proposal date: 2/5/26

	Title (Agency) and Opportunity #	Description and Link	Funding Level	Deadline
		ENVIRONMENTAL EXPOSURES (1)		
19.	Forecast: Impact of Environmental Exposures on Gut-Brain Signaling in Neurological Conditions (R01) (NIH/NIEHS) TEMP-31126	This NOFO will solicit applications for research that builds on our understanding of the gut microbiome-brain axis for the purpose of identifying improved detection, prevention, and intervention strategies for environmental exposure-induced neurological diseases. Given the overlapping gut-brain signaling pathways and the prevalence of neurological conditions with gut-related comorbidities, the scope of this program would be inclusive of a wide range of neurological outcomes, including mental health disorders and chronic neurodegenerative conditions such as Parkinson's disease and Alzheimer's disease. https://www.grants.gov/search-results-detail/359020	Total funding of \$4 million	Estimated post date: 10/27/25 Estimated proposal date: 1/15/26
		GENOMICS (3)		
20.	Forecast: ancient DNA for Modern Genomics (aDMG) Data Generation and Resource Center and Coordination Center (NIH/NHGRI) FOR-HG-26-003 FOR-HG-26-004	The goal of aDMG is to establish an ethical resource of ancient and historical human DNA (aDNA) data to advance studies about contemporary human traits and biology. The Data Generation and Resource Center would Produce high-quality, whole-genome sequence data from approved aDNA sources and harmonize with existing data to create a centralized data portal. The Coordinating Center would work with researchers and local communities to identify existing and new sources of aDNA and provide oversight and coordination of program activities across all components. https://www.grants.gov/search-results-detail/359206 https://www.grants.gov/search-results-detail/359207	Total funding of \$4.25 million	Estimated post date: 12/1/25 Estimated proposal date: 3/2/26
		GENOMICS		
21.	Forecast: Clinical Data Ecosystem for Genomics (CDEG) (NIH/NHGRI) FOR-HG-26-005	This NOFO will solicit applications for research reduce barriers to a Clinical Data Ecosystem for Genomics (CDEG) by establishing a network to identify, share, and improve approaches for clinical integration and sharing of genome sequencing data and their interpretation as structured data among labs, health care providers, and patients. https://www.grants.gov/search-results-detail/359208	TBD	Estimated post date: 12/1/25 Estimated proposal date: 3/2/26
		HEALTH IT & DATA (2)		
22.	Forecast: Advancing Bioinformatics, Translational Bioinformatics and Computational Biology Research (R01 Clinical Trial Optional) (NIH/NLM) FOR-LM-25-001	This NOFO aims to address the growing need to leverage transformative technologies—such as artificial intelligence (AI), machine learning, and large-scale computational platforms—to extract actionable knowledge from vast, diverse, and complex biological datasets. By enabling more effective interpretation and integration of multi-dimensional biological and biomedical data, this research will ultimately contribute to improving individual and population health outcomes. https://www.grants.gov/search-results-detail/359003	Total funding of \$2.5 million	Estimated post date: 10/6/25 Estimated proposal date: 2/4/26

	Title (Agency) and Opportunity #	Description and Link	Funding Level	Deadline
		HEALTH IT & DATA		
23.	Forecast: Research Grants in Clinical Informatics (R01 Clinical Trial Optional) (NIH/NLM) FOR-LM-25-002	This NOFO will support research focused on the design, implementation, and evaluation of clinical informatics tools and methods that enable data-driven discovery, promote evidence-based decision-making, and support personalized and precision health care. Emphasis will be placed on domain-independent, scalable, and reusable/reproducible approaches for the discovery, analysis, organization, and management of health-related digital objects. https://www.grants.gov/search-results-detail/359004	Total funding of \$2.5 million	Estimated post date: 10/6/25 Estimated proposal date: 2/4/26
		HIV/AIDS (2)		
24.	Forecast: Using Archived Data and Specimen Collections to Advance Maternal and Pediatric HIV/AIDS Research (NIH/NIAID) FOR-HD-25-023	This NOFO will support the secondary use of archived data and/or biospecimen collections, which represents a critical opportunity to advance research in maternal, pediatric, and adolescent HIV. The strategic reuse of these HIV-related datasets and biospecimens is essential to addressing persistent and emerging research questions in maternal and child health. https://www.grants.gov/search-results-detail/359945	Total funding of \$1 million	Estimated post date: 10/1/25 Estimated proposal date: 1/2/26
25.	Forecast: Advancing Prevention and Treatment of Bacterial STIs in HIV-affected Adolescent and Maternal Populations (NIH/NICHHD) FOR-HD-25-024	This NOFO will solicit research, including clinical trials, on bacterial STIs in adolescent and maternal populations affected by HIV. Topics may include advancement of research on diagnostic modalities and their clinical implementation, effectiveness, and safety of new microbicidal agents, as well as dissemination and implementation research on evidence-based STI prevention and treatment strategies of youth and maternal HIV-affected populations. https://www.grants.gov/search-results-detail/359948	Total funding of \$2 million	Estimated post date: 10/20/25 Estimated proposal date: 1/7/26
		IMMUNOLOGY & INFECTIOUS DISEASE (3)		
26.	Marburg virus (MARV) and Sudan virus (SUDV) Vaccines (BARDA/ASPR) 75A50125R00006	This acquisition will allow BARDA to invest Project BioShield funds for the advanced development, FDA licensure, procurement, shipping, and vendor managed inventory (VMI) storage of MARV and SUDV monovalent vaccines. https://sam.gov/workspace/contract/opp/fba2112d7da54dc49033b9adbe509953/view	Dependent upon contract	Proposal: 8/27/25
27.	Forecast: Impact of Initial Influenza Exposure on Immunity in Infants (NIH/NIAID) FOR-AI-27-024	NIAID seeks to establish, follow, and characterize longitudinal cohorts of infants and/or mother-infant dyads to determine how influenza infections and/or vaccinations shape infant and childhood immunity. These studies will define and characterize immunity and examine how these exposures influence immune responses to subsequent influenza infections and/or vaccines. https://www.grants.gov/search-results-detail/359939	Total funding of \$10 million	Estimated post date: 12/12/25 Estimated proposal date: 2/11/26

	Title (Agency) and Opportunity #	Description and Link	Funding Level	Deadline
		IMMUNOLOGY & INFECTIOUS DISEASE		
28.	Forecast: Preparedness for and Prevention of Severe Disease and Sequelae of Respiratory Viruses and Other Respiratory Pathogens (CDC/ERA) RFA-IP-26-100	This NOFO will support research to prevent and mitigate severe respiratory illness and related complications by studying the epidemiology, prevention, treatment, and outcomes of severe disease and complications of infections with respiratory viruses and other respiratory pathogens. CDC seeks to establish a preparedness and prevention infrastructure to improve public health and clinical outcomes of respiratory illness. https://www.grants.gov/search-results-detail/360203	Up to \$2 million	Estimated post date: 12/31/25 Estimated proposal date: 3/1/26
		NIH COMMON FUND (1)		
29.	Forecast: NIH Director's Early Independence Awards (DP5 Clinical Trial Optional) (NIH) NOT-RM-25-011	The NIH Director's Early Independence Award supports rigorous and promising investigators who wish to pursue independent research soon after completion of their terminal doctoral degree or post-graduate clinical training, thereby forgoing the traditional post-doctoral training period and accelerating their entry into an independent research career. https://www.grants.gov/search-results-detail/360193	Total funding of \$5.1 million	Estimated post date: 9/10/25 Estimated proposal date: 10/1/25
		RARE DISEASES (3)		
30.	Efficient and Innovative Natural History Studies Addressing Unmet Needs in Rare Diseases (R01 Clinical Trials Optional) (FDA) RFA-FD-25-017	This NOFO supports efficient and innovative natural history studies that advance medical product development in rare diseases/conditions with unmet needs. Through the support of natural history studies with high quality and interpretable data elements, FDA expects to address critical knowledge gaps, remove major barriers to progress in the field, exert a significant and broad impact on a specific rare disease or multiple rare diseases with similar pathophysiology, and facilitate rare disease product development. https://grants.nih.gov/grants/guide/rfa-files/RFA-FD-25-017.html	Up to \$400,000 per year, for up to 4 years	Multiple deadlines; NOFO open through 2/14/28
31.	Clinical Studies of Orphan Products Addressing Unmet Needs of Rare Diseases (R01 Clinical Trials Required) (FDA/OOPD) RFA-FD-25-020	This NOFO will fund clinical trials of products evaluating efficacy and/or safety in support of a new indication or change in labeling to address unmet needs in rare diseases or conditions. Additionally, through the funding of collaborative, efficient, and/or innovative clinical trials, FDA expects to increase the number of approved treatments for rare diseases and exert a broad and positive impact on rare disease drug development. https://grants.nih.gov/grants/guide/rfa-files/RFA-FD-25-020.html	Up to \$900,000 per year, for up to 4 years	Multiple deadlines; NOFO open through 10/19/27

	Title (Agency) and Opportunity #	Description and Link	Funding Level	Deadline
		RARE DISEASES		
32.	Addressing Rare Diseases Topical PCORI Funding Announcement – Cycle 3 2025 (PCORI)	This Topical PFA solicits applications proposed to address patient-centered CER questions that will fill important rare disease research gaps. PCORI is particularly interested in submissions that address the following Special Areas of Emphasis (SAEs): Approaches to symptom management for individuals with rare disease; Approaches for timely diagnosis of rare diseases; Approaches to improving care delivery for individuals with rare diseases. Applications addressing cross-cutting issues that include more than one rare disease diagnosis are encouraged, but studies focusing on a single rare disease are also acceptable. https://www.pcori.org/funding-opportunities/announcement/addressing-rare-diseases-topical-pcori-funding-announcement-cycle-3-2025	Up to \$12 million, for up to 5 years	Letter of intent: 9/23/25 Proposal: 1/13/26
		REPRODUCTIVE HEALTH (1)		
33.	Forecast: Infertility Training Center (HHS/OASH) PA-FPT-25-002	OPA will seek applications to establish and operate an Infertility Training Center to support Title X-funded organizations in expanding and enhancing root cause infertility diagnostic treatments and referrals available to patients at Title X-funded clinics. https://www.grants.gov/search-results-detail/359991	Up to \$1.5 million	Estimated post date: 7/15/25 Estimated proposal date: 8/15/25
		SUBSTANCE USE DISORDER (1)		
34.	2025 "\$100,000 Start an SUD Startup" Challenge (NIH/NIDA)	The Challenge goal is to support research ideas in the area of substance use disorders (SUDs) that are intended to be the foundation for the development of successful new startups. https://www.challenge.gov/?challenge=nida-2025-sud-startup	Total prizes of \$100,000	Proposal: 2/4/26
		THERAPEUTICS (2)		
35.	Antibiotic for Treatment of Bacterial Pneumonia or Bloodstream Infections (BARDA/ASPR) 75A50125R00002	This project is for investing in late-stage development, procurement, and stockpiling of antibiotics to treat HABP/VABP and/or BSI caused by drug-resistant bacterial and/or biothreat pathogens, and actively seeks vendors with existing domestic manufacturing capabilities or at minimum a timeline and summarized approach to onshore drug substance manufacturing and fill/finish of drug product. https://sam.gov/workspace/contract/opp/9515843dd84b4da1b02f5332151a315c/view	Dependent upon contract	Proposal: 8/26/25
36.	Forecast: Reducing Fraud and Lowering Barriers to the Production of Drugs in Shortage by Outsourcing Facilities (FDA) FOR-FD-25-023	The goals of this grant are to better understand the landscape of drug shortage products, including those vulnerable to health fraud, and identify opportunities for outsourcing facilities to meet drug shortage needs to strengthen the supply chain. Funding would also support outsourcing facilities' research and development of products that mitigate persistent drug shortages to increase supply of critical medications and stabilize the drug supply chain to prevent health fraud. https://www.grants.gov/search-results-detail/360095	Total funding of \$3 million	TBD

	Title (Agency) and Opportunity #	Description and Link	Funding Level	Deadline
		WOMEN'S HEALTH (1)		
37.	Military Family Health Research Award (DoD/Army) HT9425-23-S-SOC1-0003	This addendum to the USAMRDC BAA supports the health and well-being of the military family. Capability areas include Menopause and Midlife Women's Health; Medical Barriers to Growing and Supporting Families; Sex-Specific Health Care; and Mental and Behavioral Health Solutions. https://www.grants.gov/search-results-detail/343725	Up to \$3 million	Pre-application: 9/1/25 Invited proposal: 12/1/25

	Title (Agency) and Opportunity #	Description and Link	Funding Level	Deadline
		ADVANCED RESEARCH PROJECTS AGENCY FOR HEALTH (4)		
38.	Resilient Systems Office (RSO) Mission Office Innovative Solutions Opening (ISO) ARPA-H-SOL-24-103	RSO is interested in innovations that take a systems level approach in areas including, but not limited to, systems biology, data systems, biophysical systems, health IT systems, sociotechnical systems, health-related systems engineering, and other systems with the potential to improve health outcomes. https://sam.gov/opp/c575f73500844322be760e0d98c233ac/view	Dependent upon proposal and award mechanism	Proposal: 3/5/29
39.	Health Science Futures (HSF) Mission Office Innovative Solutions Opening (ISO) ARPA-H-SOL-24-104	HSF awardees will develop innovative technologies, tools, and platforms that can be applied to a broad range of diseases. The following interest areas define the ground-breaking research we seek to support: Breakthrough Technologies; Transformative Tools; and Platform Systems. https://sam.gov/opp/173be613d10249d8b0096c649e5203b8/view	Dependent upon proposal and award mechanism	Proposal: 3/5/29
40.	Scalable Solutions Office (SSO) Mission Office Innovative Solutions Opening (ISO) ARPA-H-SOL-24-105	ARPA-H SSO seeks solutions to improve the scalability and affordability of health care solutions, bridge gaps in underserved areas, and extend remote access to expertise by developing location-specific interventions, telemedicine solutions, and mobile health clinics. Solutions should focus on rapid innovation and the use of partnerships, also flexible distribution networks and streamlined manufacturing processes. SSO interest areas include: Advanced Technologies for Medical Product and Capability Distribution; and Biomanufacturing Innovations. https://sam.gov/opp/d85f2223a88442f3ba6eedf9a0629775/view	Dependent upon proposal and award mechanism	Proposal: 3/5/29
41.	Proactive Health Office (PHO) Mission Office Innovative Solutions Opening (ISO) ARPA-H-SOL-24-106	The Proactive Health Office (PHO) at ARPA-H is seeking solutions to improve the healthspan and health outcomes of Americans prior to the onset of disease and/or the development of diminished quality of life from illness. Interest areas include: Novel prevention, detection and prophylactic treatment methods for disease; Population-level approaches to increase the adoption of prevention and wellness behaviors; and System innovation for the delivery of proactive health outcomes. https://sam.gov/opp/ca0ae33ab9544686b47788025c67cca2/view	Dependent upon proposal and award mechanism	Proposal: 3/5/29

	Title (Agency) and Opportunity #	Description and Link	Funding Level	Deadline
		AIR FORCE (4)		
42.	Continuing Human Enabling, Enhancing, Restoring and Sustaining (CHEERS) FA238424S2233	CHEERS MAA is intended to provide a comprehensive strategy for AFRL/RH and USAFSAM's range of S&T, allowing for progression from basic research to technology maturation and transition. Areas of interest include: Aerospace Medicine and Physiology; Public Health and Preventative Medicine; Occupational Medicine and Bioenvironmental Engineering; and En Route Care/Expeditionary Medicine/Prolonged Field Care. https://sam.gov/opp/90af749106d64028a0976bae4b47e25f/view https://sam.gov/opp/bc7252f0517b48d983c63265bffb82b/view	Dependent upon proposal and award mechanism	White papers accepted on a rolling basis
43.	AFRL/RX Functional Materials Open BAA FA8650-22-S-5002	The Functional Material Open BAA seeks to exploit innovative functional materials that enable new warfighting capabilities, significantly improve the effectiveness of warfighters and their current and future systems and solve urgent operational needs. The BM&P Research area seeks to accelerate materials development, protect assets from the environment, and enable airman performance. This research area harnesses materials and processes competencies in soft matter materials characterization, molecular and synthetic biology, microbiology, biochemistry, bioinformatics, machine learning, multiscale modeling, bioelectronics, bio- functionalization, and biological engineering to create materials not easily achievable through traditional chemical synthesis or additive manufacturing. https://sam.gov/opp/2fad41c2700409c993a8c308c6f5120/view	Dependent upon proposal and award mechanism	White papers accepted on a rolling basis
44.	Research Interests of the Air Force Office of Scientific Research FA9550-25-S-0001	The focus of AFOSR is on research areas that offer significant and comprehensive benefits to our national war fighting and peacekeeping capabilities. The Chemistry and Biological Sciences Team is responsible for research activities in chemistry and biological sciences. The focus is on complex materials, microsystems and structures and well as systems of a biological natural by incorporating hierarchical design of mechanical and functional properties from the nanoscale through the mesoscale, ultimately leading to controlled well- understood chemistry/biochemistry, and material or structural behavior capable of dynamic functionality and/or performance characteristics to enhance mission versatility. https://www.grants.gov/search-results-detail/359050	Dependent upon proposal, for up to 5 years	White papers accepted on a rolling basis
45.	Research Interests of the United States Air Force Academy USAFA-BAA-2021	USAFA invites white papers and proposals for research in many broad areas, under the direction of several research centers. One such center, the Life Sciences Research Center, is intrigued by biomaterials found in nature, which use unique biologic design principles and processes to form novel structures. https://www.grants.gov/search-results-detail/330175	Dependent upon proposal, for up to 5 years	Proposals accepted on a rolling basis

		ARMY (9)		
46.	The Joint Program Executive Office for Chemical, Biological, Radiological, and Nuclear Defense Broad Other Transaction Authority Announcement (BOTAA) BOTAA-24-01	JPEO-CBRND is interested in efforts directed toward the development of enabling technologies that speed up the advanced development process. Areas of interest include: Software and Artificial Intelligence (AI), wearable sensors, threat detection, biothreat containment and aeromedical evaluation. https://sam.gov/opp/2d04622b25364669857a6a61c576ade9/view	Dependent upon proposal	Preproposals accepted through 2/7/29
47.	BAA R&D in Support of the Joint Program Executive Office for Chemical, Biological, Radiological, and Nuclear Defense (JPEO-CBRND), JPM Medical and JPL EB CBRND-BAA-22-01	The JPMO is interested in studies on new and better ways to develop medical CBRN countermeasures more rapidly and with increased efficiency through enabling technologies, life cycle bioinformatics, and improved logistics tracking. Mission areas include: Biological Medical Prophylaxis; Medical, Chemical, and Biological Countermeasures; Medical Radiological Countermeasures; Medical Diagnostic and Surveillance Systems; and Enabling Biotechnologies and Response Systems. https://sam.gov/opp/f2d01f5a6c444e32af543e9519a0805f/view	Dependent upon proposal	Proposals accepted on a rolling basis through 6/11/27
48.	USAMRDC Broad Agency Announcement for Extramural Medical Research HT9425-23-S-BAA1	R&D funded by this BAA are expected to benefit and inform both military and civilian medical practice and knowledge. Research areas include: Military Infectious Disease; Combat Casualty Care; and Military Operational Medicine. https://www.grants.gov/search-results-detail/343725	Dependent upon proposal, for up to 5 years	Pre-applications accepted until 9/30/27 Full proposal by invitation
49.	USSOCOM BAA for Extramural Biomedical and Human Performance Research and Development HT9425-23-S-SOC1	A primary emphasis of the USSOCOM Biomedical, Human Performance, and Canine Research Program is to identify and develop techniques, knowledge products, and materiel for early intervention in life-threatening injuries; PFC; human performance optimization; canine medicine/performance; brain health; immune response; automation of systematic reviews and metanalysis; and novel post-traumatic stress, depression, and anxiety treatment. Special Operations Forces (SOF) medical personnel place a premium on medical equipment that is small, lightweight, ruggedized, modular, multi-use, and designed for operation in extreme environments. https://www.grants.gov/search-results-detail/349586	Dependent upon proposal	Proposals accepted through 7/31/28 Submission of a pre-proposal is required
50.	Army Research Office Laboratory Broad Agency Announcement for Foundational Research W911NF-23-S-0001	ARL's foundational research mission spans basic research and applied research but may include advanced technology development and advanced component development and prototypes when opportunities arise to directly or indirectly help achieve ARL's mission. View the full list of research topics . https://sam.gov/opp/7560e5d4024b4e94ad3eab6180cfcc36/view	Dependent upon proposal	Proposals accepted on a rolling basis until 11/20/27

	Title (Agency) and Opportunity #	Description and Link	Funding Level	Deadline
		ARMY		
51.	Army Research Institute for the Behavioral and Social Sciences Broad Agency Announcement for Basic, Applied, and Advanced Research W911NF-23-S-0010	ARI seeks Applied Research proposals that provide a systematic expansion and application of knowledge to design and develop useful strategies, techniques, methods, tests, or measures that provide the means to meet a recognized and specific Army need. Applied Research precedes specific technology investigations or development and should have high potential to transition into advanced technology. https://sam.gov/opp/ee8d9eeec4f94269b6e1ac16b09d9417/view	Dependent upon proposal	Proposals accepted on a rolling basis until 4/30/28 Full proposal required
52.	Army Applications Lab BAA for Disruptive Applications W911NF-24-S-0008	AAL is seeking technologies that address a wide range of Army needs consistent with CFT capability focus areas and associated programs and lines of effort as well as potentially disruptive new capabilities that augment or enhance Army capability overmatch. https://sam.gov/opp/3f8ec6d36d584ca28364a2f8a10255b7/view	Dependent upon proposal	Proposals accepted through 4/4/29 Pre-proposal is required
53.	Basic and Applied Research at the US Army Combat Capabilities Development Command - Soldier Center W911QY-25-R-0023	The Soldier Center is seeking solutions in the following scientific and technical areas: Combat Feeding & Equipment; Soldier Protection & Survivability; Modeling & Simulation; Human Performance & Biomechanics; Expeditionary Maneuver Support; Aerial Delivery; and Simulation & Training Technology. https://sam.gov/opp/e85e373d22ef47018b0336fc6a258002/view	Dependent upon proposal	Concept papers accepted on a rolling basis until 2/27/30
54.	Medical CDID BAA MED CDID	MED CDID invites innovative proposals that allow future Army medical units to efficiently and effectively clear the battlefield (evacuation of wounded, ill, and injured), maximize return to duty, and overcome contested logistics (medical resupply). https://vulcan-sof.com/login/ng2/submission?collectionUuid=5417cc3c-2b60-446a-addf-cobea38cd0b1	Dependent upon proposal	White papers accepted through 12/31/2030
55.	BAA for Chemical, Biological, Radiological, Nuclear, and Explosive Defense Efforts W911SR-24-R-DEVB	DEVCOM CBC's mission is to provide innovative chemical, biological, radiological, nuclear and explosive (CBRNE) defense capabilities to enable the Joint Warfighters' dominance on the battlefield and interagency defense of the homeland. Mission areas include: Sensor technologies and biomaterials; Biological point detection; Chemical point detection; Early warning and detection; Collective protection; Respiratory protection; Decontamination; CBRN countermeasures; and Chemical biological advanced materials and manufacturing science. https://sam.gov/opp/fca6a4b42ff94fd5892fdae9799941f/view	Dependent upon proposal and award mechanism	Preproposals accepted through 8/20/29

	Title (Agency) and Opportunity #	Description and Link	Funding Level	Deadline
		BARDA (2)		
56.	BARDA Broad Agency Announcement BAA-23-100-SOL-00004	BARDA is accepting proposals related to diagnostics and POC tests for COVID and other MCM topics that include: CBRN Vaccines, Antivirals & Antitoxins; Antimicrobials; Radiological/Nuclear MCMs; Chemical Threat MCMs; Burn and Blast Medical MCMs; Diagnostics; Influenza & Emerging Diseases vaccines and therapeutics; ImmuneChip+; Flexible and Strategic Therapeutics (FASTx). https://sam.gov/opp/d832248e72e14c3c8cee96ee3c8b2170/view	Dependent upon proposal	Proposal: 9/25/28
57.	BARDA DRIVe EZ-BAA DRIVeEZBAA22100SOL00003	All AOIs are currently closed. No initial awards will be executed. Eligible +Phase submissions will still be accepted and reviewed in accordance the process outlined the EZBAA and corresponding AOI. https://sam.gov/opp/6684d4a2734047d58d6cbf7e5obdd00a/view	Up to \$750,000 per award	Proposals accepted on a rolling basis Deadlines vary by AOI
		DARPA (2)		
58.	Biological Technologies BAA HR001124S0034	Research in BTO creates biotechnological capabilities that provide tactical care and restore function to injured warfighters, increase operational resilience, develop novel functional materials, and detect and protect against threats to maintain force readiness. BTO is interested in submissions related to the following topic areas: AI/ML; Human Performance; Materials, Sensors, Processing; Ecosystem and Environmental; Biosecurity and Biosafety; and Biomedical and Biodefense. https://sam.gov/opp/5fff3c4c76c341a4a6b1d2010211c793/view	Dependent upon proposal	Abstracts & proposals accepted on a rolling basis until 9/10/25
59.	Defense Sciences Office, Office-wide HR001125S0013	The DSO Office-wide BAA invites proposers to submit innovative basic or applied research concepts or studies and analysis proposals that address one or more of the following technical thrust areas: Materials, Manufacturing, & Structures; Sensing and Measurement; Math, Computation, and Processing; Complex, Dynamic, and Intelligent Systems. https://sam.gov/opp/c3f0bedbf22c4e2daf5bb0a713f4ce4a/view	Dependent upon proposal	Abstracts accepted on a rolling basis until 6/2/26
		DEFENSE THREAT REDUCTION AGENCY (4)		
60.	Research and Development Innovations Broad Agency Announcement HDTRA1-22-S-0003	DTRA seeks proposals that will advance research, development, test, and evaluation (RDT&E) priorities across five interrelated thrust areas derived from the 2022 DTRA Strategic Plan for RDT&E (plan available at https://www.dtra.mil/): <ul style="list-style-type: none"> • Understand current and emerging WMD situations, threats, and capabilities • Enable effective and integrated WMD deterrence • Control, disable, and defeat current and emerging WMD threats • Protect the force and mitigate crises from WMD • Enable cross-cutting capabilities https://sam.gov/opp/45f3e82bc46c4d3f89560b700d1123cd/view	Dependent upon proposal, for up to 18 months	White papers accepted on a rolling basis through 2/14/27

	Title (Agency) and Opportunity #	Description and Link	Funding Level	Deadline
		DEFENSE THREAT REDUCTION AGENCY		
61.	Biological Threat Reduction with Global Partners Broad Agency Announcement (BAA) HDTRA1-24-S-0002	BTRP supports international health security efforts to address diseases caused by U.S. Biological Select Agents, pathogens of pandemic potential, and emerging infectious diseases. BTRP achieves its mission through collaboration with partner countries and the international community to minimize the threat of deliberate, accidental, and natural infectious disease outbreaks through enhanced detection, diagnosis, and reporting capabilities and biosecurity and biosafety measures. https://www.grants.gov/search-results-detail/353860	Dependent upon proposal and award mechanism	Proposal: 4/28/29
62.	FY25-29 Strategic Trends Research Initiative Broad Agency Announcement HDTRA1-24-S-0003	SI-ST's research explores a range of challenges related to nuclear, chemical, and biological weapons. The three WMD-relevant Research Thrust Areas are: strategic international dialogues, analytical studies, and emerging CWMD researcher projects. An area of general interest is: Future trends related to biological warfare, biodefense, biosecurity, and bio preparedness. https://sam.gov/opp/7a98bf70ac2a49c8b8eod71abbc93750/view	Dependent upon proposal and award mechanism`	White papers accepted on a rolling basis through 8/1/29
63.	Fundamental Research to Counter Weapons of Mass Destruction (C-WMD) HDTRA1-25-S-0001	Fundamental research efforts enable capabilities such as development of improved detection devices for traditional and nontraditional chemical agents; development of diagnostics for existing and emerging infectious disease threats; increasing knowledge and improved capabilities for development of new or improved medical and material countermeasures to CB threats for both pre- and post-exposure scenarios; enhanced personal protection against, modeling of, prevention of, or decontamination of CB threats; and providing effective elimination strategies via non-kinetic approaches for threat agent destruction, neutralization and/or sequestration. https://www.grants.gov/search-results-detail/356612	Up to \$1 million per year, for up to 5 years	White papers accepted through 9/2034
		DEPARTMENT OF ENERGY (1)		
64.	FY 2025 Continuation of Solicitation for the Office of Science Financial Assistance Program DE-FOA-0003432	SC accomplishes its mission and advances national goals by supporting: The frontiers of science—exploring nature’s mysteries from the study of fundamental subatomic particles, atoms, and molecules that are the building blocks of the materials of our universe and everything in it to the DNA, proteins, and cells that are the building blocks of life. Each of the programs in SC supports research probing the most fundamental disciplinary questions. https://www.grants.gov/search-results-detail/356590	Dependent upon award mechanism	Proposals accepted on a rolling basis through 9/30/25

	Title (Agency) and Opportunity #	Description and Link	Funding Level	Deadline
		NATIONAL SCIENCE FOUNDATION (2)		
65.	Small Business Innovation Research Program Phase I (SBIR/STTR Phase I) NSF 24-579	The NSF SBIR and STTR programs focus on transforming scientific discovery into products and services with commercial potential and/or societal benefit. Unlike fundamental or basic research activities that focus on scientific and engineering discovery itself, the NSF SBIR program supports the creation of opportunities to move fundamental science and engineering out of the lab and into the market or other use at scale, or startups and small businesses representing "deep technology ventures." The programs fund research and development, and are designed to provide non-dilutive funding and entrepreneurial support at the earliest stages of company and technology development. The required Project Pitch allows startups and small businesses to get quick feedback at the start of their application for Phase I funding. View the full list of topics. https://new.nsf.gov/funding/opportunities/nsf-small-business-innovation-research-small-0/nsf24-579/solicitation	Up to \$275,000 for up to 1 year	Project pitches accepted on a rolling basis through 11/5/25.
66.	NSF Small Business Innovation Research / Small Business Technology Transfer Fast-Track Pilot Programs (SBIR-STTR Fast-Track) NSF 24-582	The NSF SBIR/STTR Fast-Track programs provide non-dilutive, fixed amount cooperative agreements for the development of a broad range of technologies based on discoveries in science and engineering with the potential for societal and economic impacts. https://new.nsf.gov/funding/opportunities/nsf-small-business-innovation-research-small-1/nsf24-582/solicitation	Up to \$1,555,000, for up to 3 years	Project pitches accepted on a rolling basis through 11/5/25. Proposal: 11/5/25
		NAVY (3)		
67.	FY25 Long Range Broad Agency Announcement for Navy and Marine Corps Science and Technology N0001425SB001	The ONR, ONR Global, and Marine Corps Warfighting Lab are interested in receiving proposals for Long-Range S&T Projects which offer potential for advancement and improvement of Navy and Marine Corps operations. https://www.onr.navy.mil/work-with-us/funding-opportunities/fy25-long-range-broad-agency-announcement-baa-navy-and-marine	Dependent upon proposal	Proposals accepted on a rolling basis until 9/30/25
68.	NRL Long Range Broad Agency Announcement (BAA) for Basic and Applied Research N00173-24-S-BA01	The Naval Research Laboratory is seeking to advance technology developed for in vitro diagnostic devices that are amenable to military hardening and integration with communication capabilities to support the medical diagnostic and epidemiological detection and biosurveillance needs of the US military across multiple Echelons of Care and specifically for field deployment at Echelons 1 or 2. https://sam.gov/opp/1ee082f371ab449294aco84bb06ba6co/view	Dependent upon proposal and award mechanism	White papers accepted through 9/30/25

	Title (Agency) and Opportunity #	Description and Link	Funding Level	Deadline
		OFFICE OF THE UNDERSECRETARY OF DEFENSE (1)		
69.	<p>OUSD(R&E) Seeks Advanced Manufacturing, Prototypes and Materials (AMPAM)</p> <p>HQ003425BOTA1</p>	<p>OUSD(R&E)'s goal is to foster increased collaboration and partnership between Government and Industry to identify, develop, and mature new or improved manufacturing and repair processes and bridge the gap between discovery and implementation of new capabilities for the warfighter. Examples may include Bio-manufacturing of medical related material and Bio-manufacturing of materials or products in the supply chain.</p> <p>https://sam.gov/opp/64a31b87112843b58dfb13f37bfa3df1/view</p>	Dependent upon proposal and award mechanism	White papers accepted on a rolling basis through 10/2/27
		PATIENT-CENTERED OUTCOMES RESEARCH INSTITUTE (7)		
70.	Phased Large Awards for Comparative Effectiveness Research -- Cycle 3 2025	<p>This PFA invites applications for high-quality comparative clinical effectiveness research (CER) projects that will address critical decisions faced by patients, caregivers, clinicians, and stakeholders across the health and healthcare community and for which there is insufficient evidence. Applications must address at least one of the National Priorities for Health.</p> <p>https://www.pcori.org/funding-opportunities/announcement/phased-large-awards-comparative-effectiveness-research-pcori-funding-announcement-cycle-3-2025</p>	Up to \$22 million, for up to 6.5 years	Letter of intent: 9/23/25 Proposal: 1/13/26
71.	Broad Pragmatic Studies Funding Announcement -- Cycle 3 2025	<p>This PFA invites applications for high-quality comparative clinical effectiveness research projects. All applications must align the proposed research with at least one of the National Priorities for Health. Applicants have the option to choose up to three of twelve topic themes, based on how their proposed research aligns with the themes. Cycle 3 SAs include: Social Isolation and Loneliness in Older Adults, Health Communication Strategies for Uptake of COVID-19 Vaccine, and Promoting Sleep Health in Inpatient Settings.</p> <p>https://www.pcori.org/funding-opportunities/announcement/broad-pragmatic-studies-pcori-funding-announcement-cycle-3-2025</p>	Up to \$12 million, for up to 5 years Dependent upon award mechanism	Letter of intent: 9/23/25 Proposal: 1/13/26
72.	Advancing the Science of Engagement in Research PCORI Funding Announcement -- Cycle 3 2025	<p>This PFA will fund studies that build an evidence base on engagement in research, including: Measures to capture structure/context, process, and outcomes; Techniques that lead to effective engagement; How these techniques should be modified and resourced for different contexts, settings, and communities to ensure equity; How engagement supports successful research.</p> <p>https://www.pcori.org/funding-opportunities/announcement/advancing-science-engagement-research-pcori-funding-announcement-cycle-3-2025</p>	Up to \$1.5 million, for up to 3 years	Letter of intent: 9/23/25 Proposal: 1/13/26

	Title (Agency) and Opportunity #	Description and Link	Funding Level	Deadline
		PATIENT-CENTERED OUTCOMES RESEARCH INSTITUTE		
73.	Improving Methods for Conducting Patient-Centered Comparative Clinical Effectiveness Research PCORI Funding Announcement -- Cycle 3 2025	For this PFA, PCORI has identified the following areas as programmatic priorities: Methods to Improve the Use of AI and ML in Clinical Research; Methods to Improve Study Design; Methods to Support Data Research Networks; Methods Related to Ethical and Human Subjects Protections Issues in CER. https://www.pcori.org/funding-opportunities/announcement/improving-methods-conducting-patient-centered-comparative-clinical-effectiveness-research-pcori-funding-announcement-cycle-3-2025	Up to \$750,000, for up to 3 years	Letter of intent: 9/23/25 Proposal: 1/13/26
74.	Engagement Award: Capacity Building -- Fall 2025 Cycle	The Engagement Award: Capacity Building opportunity funds projects that build communities prepared to participate in PCOR/CER. These awards support organizations with strong ties to patients, caregivers, clinicians, and other stakeholders who have a connection to a research focus area and seek to better equip stakeholders to engage as partners in PCOR/CER. https://www.pcori.org/funding-opportunities/announcement/engagement-award-capacity-building-fall-2025-cycle	Up to \$300,000, for up to 2 years	Letter of intent: 9/29/25 Proposal: 1/12/26
75.	Engagement Award: Stakeholder Convening Support -- Fall 2025 Cycle	The Engagement Award: Stakeholder Convening Support funding opportunity provides support to organizations and communities to hold multi-stakeholder convenings, meetings, and conferences that include a combination of patients, caregivers, researchers, clinicians, purchasers, payers, health system leaders, and/or other stakeholders. Convenings should be designed with the active collaboration and partnership of patients, community groups, and/or other stakeholder organizations. https://www.pcori.org/funding-opportunities/announcement/engagement-award-convening-support-fall-2025-cycle	Up to \$125,000, for up to 1 year	Letter of intent: 9/29/25 Proposal: 1/12/26
76.	Engagement Award: Dissemination Initiative -- Fall 2025 Cycle	The Engagement Award: Dissemination Initiative funding opportunity aims to support projects that help organizations and communities plan for or actively bring pertinent PCORI-funded research findings to their specific audiences, including relevant patients, clinicians, communities, and others, in ways that will command their attention and interest and encourage use of this information in their healthcare decision making. https://www.pcori.org/funding-opportunities/announcement/engagement-award-dissemination-initiative-fall-2025-cycle	Up to \$300,000, for up to 2 years	Letter of intent: 9/29/25 Proposal: 1/12/26
